

	Upgrade_Matrix 21st century skills	
General competence		General competence
1. Digital literacy: Use ICT effectively, efficiently and responsibly.	This matrix gives an overview of the 8 clusters of skills "21st century skills"	2. To communicate: To deliver and receive a message effectively and efficiently.
Thinking Competence	Thinking Competence	Thinking Competence
3. Creativity : Think up, elaborate and analyze new ideas.	4. Critical thinking: Formulate own substantiated view or opinion.	5. Problem solving: Recognize a problem and come up with a plan to solve the problem.
Inter- and intra-personal competence	Interpersonal and intrapersonal competence; Social competence	Intra-personal competence
6. Collaboration: Realize a goal with others and complement and support others in doing so.	7. Social and cultural competences: Learning, working and living effectively with people from different ethnic, cultural and social backgrounds.	8. Self-regulation: Achieve goal-oriented and appropriate behavior.

1. Digital literacy: using ICT effectively, efficiently and responsibly. 1-5. ICT skills: knowledge of buttons, using hard ware and software. 6-9. Media literacy: knowledge, skills and attitudes needed to use media consciously, critically and actively. 10-14. Information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 16. Speaking, listening, writing, reading in Dutch, 17. exchanging information with others in a goal-oriented way: resence of a message, expressing it effectively, being clear, avoid 18. Dealing adequately with different communicative situations: opresentations, debates, etc.; knowing the conversation technique social conventions for each situation, 19. use different means of communication: texts, films,; use different means of communication: texts, films,; use different means of communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different means of
This matrix gives for each of the 8 21st century skills 10-14. Information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g., brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 17. exchanging information with others in a goal-oriented way: re essence of a message, expressing it effectively, being clear, avoid a labeliance is effectively, being clear, avoid in the season of the San overview of the corresponding competences. 28. Computational thinking: 29. Lower information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 29. Lower different transpare is in doing so, so an overview of the corresponding competences. 29. Lower different strategies in doing so, so an overview or opinion. 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 21. ledentify: inaccuracies, so an overview or opinion. 22. identify inaccuracies, so are vision/opinion and a situation from different sides, so an overview or opinion. 23. thinking out of the box, so are the conversation techniques; e.g., brainstorming, so do find possibilities which ICT offers to communic effectively. 25. the desire to be well information and estimate its value, so an opinion. 26. the ability to ask meaningful questions, so an opinion. 27. the desire to be well informed decisions. 28. the ability to ask meaningful questions, so an opinion. so an accordance
6-9. Media literacy: knowledge, skills and attitudes needed to use media consciously, critically and actively. 10-14. Information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 16. Creativity: think up new ideas, develop them and analyse them. 17. curiosity, 28. Being open to change, 29. tusing creative techniques; e.g. brainstorming, 24. using creative techniques; e.g. brainstorming, 25. see a wision/opinion and a situation from different sides, 25. tendency to look for reasons and causes 27. forward-looking thinking, being farsighted 18. Dealing adequately with different communicative situations: or presentations, debates, etc.; knowing the conversation techniques social conventions for each situation, social conventions for each situation, social conventions for each situation; or social conventions for each situation; use different servategies in doing so, 20. have insight into the possibilities which ICT offers to communicative situations: or carbon techniques social conventions for each situation; use different means of communication: texts, films,; use different means of communicative situations: or carbon techniques; ocial conventions for each situation; use different means of communicative items, use different means of communicative situations: ocial conventions for each situation, social conventions for each situation. 18. Dea
10-14. Information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative technology; ear vision of the box, 24. using creative technology; ear vision of the box, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 10-14. Information need; on this basis, an overview of the corresponding competences. 10-14. Information skills: identifying and analysing an information need; on this basis, social conventions for each situation; texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 21. dealth in the possibilities which ICT offers to communication: texts, films,; use different strategies in doing so, 22. leditorial thinking: for
10-14. Information skills: identifying and analysing an information need; on this basis, searching for, selecting, processing and using relevant information. 15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 16. Creativity: think up new ideas, develop them and analyse them. 17. Curiosity, 18. Even from the box, 29. Being open to change, 21. Identifying, analyzing and defining (complex) problems, 22. Use officerent means of communication: texts, films,; use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies in doing so, conventions for each situation, 19. use different strategies for dommunic effectively. 19. Use different strategies in doing so, conventions on texts, films,; use different strategies in doing so, conventions for each strategies for dommunic effectively. 19. Use different strategies in doing so, conventions for each strategies for dommunic effectively. 21. Identifying, analyzing
15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted use different strategies in doing so, 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 21. curiosity, 22. log. A creative very information and estimate its value, 23. see through information and estimate its value, 24. identify inaccuracies, 25. ledentify inaccuracies, 26. the desire to be well informed, 27. being open-minded, seeing alternatives, 28. thinking up new ideas and concepts 29. logical reasoning when faced with problems, 21. see through information and estimate its value, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions.
15. Computational thinking: (re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 21. defictively. 22. identify inaccuracies in such a way that it becomes possible to solve the problem and coming up with a the problem. 21. curiosity, 22. identify inaccuracies, 23. see a vision/opinion and a situation from different sides, 24. the desire to be well informed, 25. the ability to ask meaningful questions, 26. tendency to look for reasons and causes 27. forward-looking thinking, being farsighted 20. have insight into the possibilities which ICT offers to communic effectively. 20. have insight into the possibilities which ICT offers to communic effectively. 22. dentify inaccuracies, 23. tendency or opinion. 21. gereality inaccuracies, 22. identify inaccuracies, 22. identify inaccuracies, 22. identify inaccuracies, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions.
(re)formulating problems in such a way that it becomes possible to solve the problem with the help of computer technology. 3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 4. Critical thinking: formulating an own, substantiated view or opinion. 21. Creativity: think up new ideas, develop them and analyse them. 22. Identify inaccuracies, 23. Identify inaccuracies, 23. see a vision/opinion and a situation from different sides, 24. the desire to be well informed, 25. the ability to ask meaningful questions, 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives, 28. Creativity: think up new ideas, develop them and analyse them. 29. Problem solving: recognizing a problem and coming up with a the problem. 21. Identifying, analyzing and defining (complex) problems, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions.
3. Creativity: think up new ideas, develop them and analyse them. 21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thendency to look for reasons and causes 27. forward-looking thinking, being farsighted 4. Critical thinking: formulating an own, substantiated view or opinion. 21. curiosity, 22. identify inaccuracies, 23. see a vision/opinion and a situation from different sides, 23. see a vision/opinion and a situation from different sides, 24. the desire to be well informed, 25. the ability to ask meaningful questions, 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives, 28. Problem solving: recognizing a problem and coming up with a the problem. 29. Identifying, analyzing and defining (complex) problems, 22. logical reasoning when faced with problems, 22. logical reasoning and using strategies for dealing with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions.
21. curiosity, 22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 21. see through information and estimate its value, 22. identify inaccuracies, 22. identify inaccuracies, 23. see a vision/opinion and a situation from different sides, 24. the desire to be well informed, 25. the ability to ask meaningful questions, 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives, 28. the problem. 29. Identifying, analyzing and defining (complex) problems, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions. 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives,
22. Being open to change, 23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 28. lidentify inaccuracies, 29. identify inaccuracies, 21. identifying, analyzing and defining (complex) problems, 21. identifying, analyzing and defining (complex) problems, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions. 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives,
23. thinking out of the box, 24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 28. the desire to be well informed, 29. the ability to ask meaningful questions, 29. tachtiny indectraction, 20. logical reasoning when faced with problems, 21. knowing and using strategies for dealing with problems, 22. logical reasoning when faced with problems, 23. knowing and using strategies for dealing with problems, 24. formulating a plan to solve problems, 25. take well-founded decisions. 26. thinking up new ideas and concepts 27. being open-minded, seeing alternatives,
24. using creative techniques; e.g. brainstorming, 25. see new connections, opportunities 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 28. the desire to be well informed, 29. the ability to ask meaningful questions, 29. the ability to ask meaningful questions, 29. the ability to ask meaningful questions, 20. tendency to look for reasons and causes 21. being open-minded, seeing alternatives, 22. the ability to ask meaningful questions, 23. knowing and using strategies for dealing with problems, 24. the desire to be well informed, 24. formulating a plan to solve problems, 25. take well-founded decisions. 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives,
25. see new connections, opportunities 25. the ability to ask meaningful questions, 26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 25. the ability to ask meaningful questions, 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives, 28. take well-founded decisions. 29. take well-founded decisions.
26. thinking up new ideas and concepts 27. forward-looking thinking, being farsighted 26. tendency to look for reasons and causes 27. being open-minded, seeing alternatives,
28. being action-orientated, taking initiative, daring to do / try things out, 28. openness to and respect for the views of others,
29. daring to take (responsible) risks; seeing mistakes as a learning opportunity. 29. willingness to consider those points of view in one's own thinking,
30. examine one's own thinking process,
31. adjusting one's decision, opinion or action if necessary.
6. Cooperation: achieving a goal with others and complementing and supporting others in doing so. 7. Social and cultural competences: learning, working and living effectively with people from different ethnic, cultural and social 21. setting realistic goals and priorities
others in doing so. 21. setting realistic goals and priorities 22. goal-oriented behavior: concentrating on a task, motivating or
partnerships/networks (multidisciplinary working, co-creation), 21. be aware of one's own responsibility, as an individual and as a perform a task, carrying out a task independently;
38. recognizing and acknowledging different roles for him/herself and others; for collective, Monitoring the process of task performance (planning, time management)
example: taking responsibility for one's own task, dealing with hierarchy,, 22. knowledge of culture and ability to reflect on cultural differences, Reflecting on his/her actions and performance of the task;
39. negotiating and reaching agreements with others in a team, 23. demonstrate empathy and interest in others (emotional skills, social Use feedback on one's own behavior and actions in order to make
40. adopt a positive and open attitude towards other ideas intelligence) follow-up choices,
41. asking for, giving and receiving help and feedback 24. be able to work in an intercultural and cross-cultural manner and be 24. insight into the development of one's own competences
42. respecting differences; functioning in heterogeneous groups able to identify and reflect on one's own feelings and opinions, Justifying one's own actions and choices;
43. (also increasingly) virtual cooperation: via ICT tools, between man and robot, between man and intelligent machines. 25. communicate constructively in different social and cultural situations with respect and understanding for other views, expressions and behavior
(tolerance)
26. recognizing codes of behavior, for example: headscarves or not, praying
or not, man/woman interaction, greetings, meals, topics for discussion productivity and accountability; social and cross-cultural skills (see
during breaks, ,
27. being customer-oriented: having feeling for the customer, customer-
friendliness.
